Building

It is located on a corner, on Av. Libertador, with three clear facades, it displays imposing slabs that serve as a tray for its gardens.

Green facades act as a natural noise insulator because they absorb and reduce high frequency sounds, reducing noise by up to 10 decibels.

They also reduce the interior temperature of a building by up to 5 degrees in summer and maintain the temperature in winter.

It is established in an area with strong commercial dynamics.

It has a great view, not only because of its location on the corner and on Av. Libertador, but also because its architecture and volumetry will make it a new milestone in the architecture of our times.
