Description

Tower located on Presidente Berro street between Avenida 8 de Octubre and Avenida Italia, guaranteeing connectivity and proximity to all public and private services and facilities.

The possibility of immediate access to the main fast-track arteries in and out of the city, as well as its proximity to different strategic points in the area, such as the main national and international bus terminal in Uruguay, make it a unique project, with a strong urban imprint, to live and connect with the city.

The tower under the horizontal property regime, destined for apartment units promoted by Law 18,795, is developed in variable levels between 4 and 5 floors along the slope of Presidente Berro street, made up of two independent vertical circulation cores. The project has basements for garages and technical areas.

The residential program is made up of apartment units, studio apartments, 1 and 2 bedrooms.

At the access level on Presidente Berro street, each independent pedestrian access has its own Lobby, and this connects to the vertical circulation core of each sector. On both sides of the tower, two vehicular accesses along Presidente Berro street flank it, with access control and a motorized gate.
